

Highly Educated Professional

Triggers

I trained hard to become a doctor, I was well respected and earned a good wage. Now I'm struggling to earn enough money in a low skilled job. This is not the life that I had envisioned for myself.

Goals

To obtain employment as a doctor in this country so that I can use my skills, fulfil my potential and earn a better salary

I need to know

What level of Danish do I need in order to work as a doctor in Denmark? Do I need to improve my English as well? Do I need any other certifications to obtain a job? How is the salary as a doctor compared to in my home country?

I need to feel

Reassurance that I can get by and provide for my children.

Recognition of my skills and knowledge within the field of medicine.

Intrinsic Motivations to learn

Being able to use her education in a meaningful way. Being a role model for her children. Wishing to contribute to her new country of residence out of gratitude.

Extrinsic Motivations to learn

Societal expectation to contribute to Danish society. Being able to economically provide well for her family.

Notes

Used to work as a doctor in her home country, but recently had to flee for safety. Highly motivated. Good digital skills. Has a part time job working at a flower shop and spends a lot of time studying Danish.
