

# Humanising the Process

## Triggers

Worried that AI lacks emotional intelligence and replaces creativity. Using it might dehumanize the learning process.

## Goals

Improve student learning and use AI tools to make lessons more interactive without losing the human elements of teaching and learning.

## I need to know

Understand the fundamentals of how AI works. Know the limitations of AI - including the potential for bias and factual errors.

## I need to feel

I need to feel that this is meaningful for me and my students.

## Intrinsic Motivations to learn

Desire to improve student learning and to innovate and stay relevant.

## Extrinsic Motivations to learn

Learning AI could lead to promotions and could be applied to other areas of life.

## Notes

Adult educator for foreign languages as well as a music teacher (in foreign languages) for kids
