

# Supporting Integration

## Triggers

Worrying about whether the activities I am offering them will bring them closer to the aim of finding a job or starting to study

## Goals

To provide my participants with the best learning experience, increasing their knowledge of Swedish and getting them motivated to continue their efforts to integrate in Swedish society

## I need to know

How AI works and if there is anything there which can help my students

## I need to feel

Like I am making a difference in my participants' lives

## Intrinsic Motivations to learn

Seeing my participants learning new things and feeling better mentally and emotionally. Finding new pathways to increase participants' motivation

## Extrinsic Motivations to learn

The employment agency which has sent us the participants, being satisfied with the learning experience that the participants have had

## Notes

A trainer who works on integration programs for migrant women who are far from the labor market
